SUMMARY

I am a Software Developer with 3 years of experience working in startups and medium-sized companies across various domains. I excel at quickly learning and implementing new technologies in real-world projects. I am passionate about continuous learning and am eager to contribute to a dynamic team where I can grow and make a meaningful impact.

EXPERIENCE

Software Engineer

Altogic   September 2022 – September 2024, Delaware

· Developed developer tools and AI-based applications, enhancing productivity and innovation within the developer community.
· Collaborated on projects like Agnost.dev, Aipage.dev, and Resinq, implementing features that leverage AI to improve user experience and automate processes.
· Collaborated closely with cross-functional teams to design and implement new features, ensuring a seamless and efficient user experience.

Front-End Developer

Hype Data-Driven Marketing Agency   September 2021 – September 2022, Istanbul

· Conducted A/B testing for our clients to identify areas of improvement and implement enhancements.
· Developed custom web applications for clients using React.js and Material-UI, and managed their ongoing maintenance.
· Provided numerous integration services to clients using Google Tag Manager.

PROJECTS

Resinq

Altogic · resinq.com · May 2024 – August 2024

· A platform enabling users to upload documents and train a chatbot using their content. Next.js, Tailwind CSS,Typescript
· By utilizing OpenAI's advanced vector store and Assistant API, the goal is to enhance user interactions by vectorizing the uploaded files and matching them with the Assistant API, providing AI-powered customer support chatbot assistance.

Agnost.dev

Altogic · agnost.dev · April 2023 – August 2024

· It used to be a platform providing a modern and efficient approach to developing applications using microservices, serverless architecture, and Kubernetes, but now it has become an open-source, self-hosted alternative to Vercel, Netlify, Railway.app, Render, or Heroku, running on Kubernetes clusters.
· Led the integration of microservices in Agnost.dev, reducing deployment time by 30%.

LexChat.Ai

Altogic · lexchat.ai · March 2024 – May 2024

· An AI-based platform that embeds Turkish laws from the necessary authorities, stores them in a vector database, and allows users to find precedent decisions through a search form.

AiComponent.dev

Altogic · aicomponent.dev · February 2024 – March 2024

· An AI-powered platform for building components with minimal coding effort. Next.js, Tailwind CSS, TypeScript
· I developed a system that produces advanced web components with the help of prompts received from the user using OpenAI APIs.
· Innovated and launched AI-based developer tools, boosting community engagement by 20%.

AiPage.dev

Altogic · aipage.dev · September 2023 – February 2024

· An AI-powered platform for designing landing pages with minimal coding effort. Next.js, Tailwind CSS, TypeScript
· Reached 10.000 user with AI hype, implemented quick features

Rock Paper Scissors Game

Personal · rock.paperscissors.online · June 2020 – July 2020

· An online real-time rock paper scissors game was developed with Nuxt.js and Tailwind CSS, providing a seamless gaming experience to over 3,000 active users simultaneously.
· User experience was enhanced by 100% through the development of a real-time connection using Socket.io.

EDUCATION

Computer Science (Computer programming)
İstanbul Gelisim University · 2018 – 2020

SKILLS

React.js, Next.js, Vue.js, Nuxt.js, TypeScript, JavaScript (Node.js), PHP (Laravel, Codeigniter), Redux, HTML, CSS (Sass, PostCSS), Tailwind CSS, REST, SQL, MsSQL, MySQL PostgreSQL, MongoDB, Docker, Linux Server Management (Basic level)
